

## PHINIA Expands Vehicle Coverage and Repair Solutions at Automechanika Frankfurt 2026

- Expanded coverage across product lines for Chinese vehicle applications and a growing vehicle electronics portfolio help workshops respond to evolving vehicle parc demands
- Professional+™ brake pads and DFP5 repair solutions to create new opportunities for commercial vehicle workshops in Europe, the Middle East, and Africa (EMEA)
- New battery state of health (SoH) reporting and remote diagnostics solutions help workshops efficiently service all vehicle types and technologies in EMEA markets
- Hall 4.0, Stand D51 to showcase solutions from PHINIA's leading aftermarket brands, Delphi®, Delco Remy®, and Hartridge™, with live demonstrations in the Experience Park

**Auburn Hills, Mich. (September 7th, 2026)** - PHINIA Inc. (NYSE: PHIN), a diversified, industrial supplier and global leader in the development of fuel systems, electrical systems, and aftermarket solutions, will showcase a major expansion of its aftermarket offering at Automechanika Frankfurt 2026 to address evolving vehicle parc trends across Europe and beyond through increased coverage for Chinese vehicle applications, new commercial vehicle repair solutions, and an expanded vehicle electronics portfolio. Bringing together Delphi, Delco Remy, and Hartridge, the company will demonstrate how independent workshops can unlock new repair opportunities while navigating growing vehicle complexity.

At Hall 4.0, Booth D51, visitors will explore a portfolio defined by industry-leading coverage, rapid new-to-range expansion, and proven product reliability. This will be complemented by live demonstrations at the Delphi Technical Van in the Experience Park, showcasing real-world scenarios designed to help independent workshops expand service capabilities and build technical confidence. PHINIA will also be represented by a team of global aftermarket experts, providing customers and media with insights and market expertise from the different regions where the company is located.

"The vehicle parc is changing faster than ever, particularly with the growth of Chinese brands, electrification, and increasingly complex vehicle electronics," said Juan Thomaz, General Manager, Aftermarket Solutions, EMEA, at PHINIA. "Our focus at Automechanika is ensuring distributors and workshops have access to our trusted product portfolio, diagnostic capability, connected workshop solutions, and technical support needed to service these vehicles confidently and profitably."

"I am excited to attend my first Automechanika representing PHINIA and to demonstrate how our global aftermarket strategy is helping distributors and workshops succeed through recognized brands and technical expertise," said Dan Griffin, Aftermarket Solutions President at PHINIA. "Combining the engineering excellence of a global Tier 1 supplier with the agility of an aftermarket specialist and a deep understanding of global market needs, PHINIA is uniquely positioned to support customers around the world as the industry continues to evolve."

Key product showcases at Automechanika Frankfurt 2026 will include PHINIA's fast-growing EMEA aftermarket portfolio:

- Delphi now delivers **#1 coverage across 20 product lines in EMEA**, including Steering & Suspension, Braking, Sensors, Ignition Coils and EGR valves, **while its Fuel Pump Module Assembly range achieves #1 coverage across North America** — supporting distributors with extensive vehicle parc coverage and workshops with dependable, easy-to-fit solutions.
- **A dynamic new-to-range pipeline** in EMEA, PHINIA delivered 80 first-to-market launches in 2025 and is on track to match this progress in 2026. With nearly 2,000 SKUs added in 2025, over 5000 SKUs are now available globally. This also included a further 115 first-to-market launches in North America in 2025, with more to come in 2026, continuing our expanded vehicle coverage and market-leading availability.
- Expanded coverage of **Chinese vehicle applications**, achieving the industry's leading range coverage in Steering & Suspension and Braking in EMEA

- **Enhanced** workshop solutions, including **new battery state of health (SoH) reporting** functionality that enables workshops to assess EV battery health in a single click and generate a clear, customer-friendly report. Further strengthening the workshop ecosystem, PHINIA's future release of a **new remote diagnostics solution** will provide advanced capabilities across vehicle types and technologies, helping workshops complete more complex repairs efficiently.
- The **Delphi Professional+ brake pads range for light commercial vehicles** are engineered for higher loads and demanding duty cycles. The range delivers an average of 40% greater durability, reducing replacement frequency and maximizing uptime. Integrated shims improve comfort and noise performance, and fitment grease included with every pad set supports correct installation. The Professional+ premium product line is also available in North America, featuring steering and suspension components engineered for harsh operating environments and demanding duty cycles. The range delivers dependable performance and long-lasting durability, helping reduce maintenance frequency and maximize uptime.
- An **expanded vehicle electronics offering** builds upon the successful introduction of NOx sensors with additional launches including ride height level sensors, GDI sensors, and liquid fuel pressure sensors.
- In heavy-duty applications, the **MDEG pump repair program** introduces the DFP5 repair solution for high-pressure truck systems. This now covers more than 400,000 vehicles in EMEA and supports sustainable servicing of Euro 6 common rail engines.
- Delphi also boasts advanced cataloguing and data capabilities, including Premier **TecAlliance Supplier** status, expanded cross-referencing, and 360° imagery to improve product identification.

At Automechanika Frankfurt 2026, PHINIA will also celebrate Delco Remy's 130th anniversary, recognizing over a century of innovation in rotating electrics.
